

310 eko Rapid

Epoxy-Based Rapid Adhesive

Product Description:

310 eko Rapid is a two-component, multi-purpose adhesive with fast and strong adhesion quality.

Areas of applications:

- For the adhesion and repairing of some materials such as iron, aluminium, glass, ceramics, tiles, porcelain, marble, wood bakalite, ebonite, etc.
- In transport vehicles; radiator hole; spoiling and holes of the vehicle body
- For filling the missing parts and gaps when repairing
- In water and gas installations
- For repairing the holes, cracks and breaks of various electric devices
- Warning: it is not suitable for adhering polyethylene, teflon, silicone rubber, soft PVC and similar materials

Features:

- Resistant to many chemical materials
- A good electric isolator

Technical data:

Shore A hardness (DIN 53505)	95 ± 5
Employment time (min) (at +23°C)	Appr. 5
Hardening time (min) (at +23°C)	Appr. 20

Technical data are approximately provided according to a temperature of + 20°C and a relative humidity of 50%.

Preparing the substrate:

The application surfaces should be clean, dry and grease- and dust-free. They should be sanded if possible.

Application:

- The required amount is calculated and A and B components are mixed equally.
- The prepared mixture is spread on the substrates within 5 minutes; after 5 minutes the mixture begins hardening.
- After the parts are combined, they should be rested by keeping it pressed and stable with a tool at room temperature (Appr. +20°C) for minimum 20 minutes.

Packaging:

10 gr + 10 gr aluminium tube / 120 pcs in a box

Storage:

- They should be protected from water, frost and adverse air conditions.
- The opened products should be consumed immediately.
- Shelf life is maximum 1,5 year conditional to complying with the abovementioned storage conditions.
